

MOHAMED MAZEN ELAGAMY

Computer Engineering Undergraduate | AI/ML · Software Development · Test Automation · DevOps · Cybersecurity

✉ m.mazenelagamy@gmail.com ☎ +20 01558887707 📍 Alexandria, Egypt [in Mohamed-Elagamy](#) [🌐 mohamedelagamy-tech](#)

PROFILE

Computer Engineering undergraduate with a strong academic record and growing expertise in AI/ML, cybersecurity, DevOps, software development, and test automation. Hands-on experience developing software and machine learning solutions, with practical exposure to automated testing, containerization, Linux, networking, and distributed applications. Particularly interested in applying AI-driven approaches to real-world problems while continuing to expand expertise across emerging technologies. Driven by curiosity, continuous learning, and a commitment to building reliable and impactful technical solutions.

EDUCATION

BSc. Computer Engineering AASTMT, Alexandria GPA: 3.97 Expected Graduation: 2028	2024 – Present
Secondary Education – IGCSE AAST International Educational Programs Score: 99.4%	2019 – 2024

EXPERIENCE & CERTIFICATIONS

Test Automation Intern – Software Quality Assurance Siemens Digital Industries Software	2026
- Built a JavaScript-based test case management system as part of the onboarding process. - Developed automated tests for a software product using Playwright, JavaScript, and BDD. - Independently took sole ownership of automating a designated area of a software product, applying test automation practices to a real-world software product.	
Software Engineering Intern – IT Automation & Devops Bibliotheca Alexandrina	2026
- Gained hands-on experience with Linux, Docker, Docker Compose, Docker Swarm, NGINX, networking & Container Orchestration. - Worked with distributed applications across multiple virtual machines, focusing on containerization, deployment, scaling and load balancing. - Deployed and managed containerized applications in distributed environments using Docker Swarm.	
AI & Machine Learning L1 – Professional Training ICTHub Egypt	2026
- Completed AI & ML training covering foundational concepts and workflows. - Implemented ML algorithms and performed data preprocessing, analysis, and visualization using Python. - Applied model training, testing and evaluation techniques on structured datasets. - Gained practical experience with supervised and unsupervised learning models. - Developed a Python-based ML pipeline project to automate preprocessing, training, and evaluation on any dataset.	
Google Cybersecurity Level 1 – Professional Training Coursera Future Skills Academy UNDP-MBRF	2025
- Analyzed cyberattacks, malware behavior, and common threat vectors. - Applied network security fundamentals and malware mitigation techniques. - Gained hands-on exposure to cybersecurity concepts and industry tools.	
IEEE AAST RZTH TrackMate AASTMT	2025
- Actively participated in technical and engineering team activities. - Recognized for engagement — awarded 3rd Place Certificate of Achievement.	

TECHNICAL SKILLS

Languages: C/C++ · Java · Python · JavaScript · SQL · HTML/CSS
AI / ML: PyTorch · Scikit-learn · Pandas · NumPy · SciPy · Matplotlib · Seaborn
Software Engineering: OOP · Data Structures
DevOps & Infrastructure: Docker · Docker Compose · Docker Swarm · NGINX · Linux · Networking
Testing & QA: Playwright · BDD · MCP Servers
Cybersecurity: Network Security · Security Fundamentals · SIEM · Incident Response
Web & Tools: React · FastAPI · Vite · Streamlit · Git/GitHub

LANGUAGES

English — Fluent
Arabic — Native

SOFT SKILLS

- Teamwork & Collaboration
- Logical Reasoning
- Time Management
- Problem Solving
